01 / COMPANY OVERVIEW

Real solutions. Forward motion.

Transport and logistics, automotive and CNG services, equipment supply, structured instalment sales, and practical technology solutions.

EverTECH Integrated Solutions and Logistics Limited is a Nigerian operating company serving individuals, commercial operators and businesses. Our firsthand experience in transport and vehicle maintenance guides how we assess needs, structure practical solutions and support customers.

Our business scope

Supply, installation, maintenance and sale of company-owned vehicles, CNG systems, machinery, equipment, solar products and other goods, including eligible instalment-payment sales, alongside transport, logistics, fleet-management and technology services.

Built close to the problem

Move people and goods. Keep vehicles productive. Improve access to useful assets. Make operations easier to manage.

How to read this profile

Transport and logistics, CNG work, vehicle support and instalment-sale administration form our operating foundation. Wider equipment and energy-product supply is handled by enquiry. Tracking and vehicle security services are in development. Scope, stock, technical suitability, location and delivery capacity are confirmed for each engagement.

Company details

Legal name: EverTECH Integrated Solutions and Logistics Limited
Registration: RC 9799633
Office: Plot 1, Felicity Plaza, 1st Floor, Freedom Estate, Magboro, Ogun State, Nigeria

02 / SERVICES AND AVAILABILITY

One company. Connected capabilities.

Transport & logistics | Service enquiries

Passenger transport, goods movement and fleet coordination. We agree the vehicle, route, timing, responsibilities and commercial terms for each job.

CNG conversion & support | Service enquiries

CNG systems and components, vehicle assessment, installation and maintenance support. The suitable kit, cylinder, work scope, price and after-sales responsibilities are confirmed before work begins.

Automotive services | Confirm availability

Vehicle diagnostics, repairs and maintenance support, including Volkswagen Transporter T4 experience. Customers provide their vehicle details and symptoms so we can confirm the work we can undertake.

Vehicles, equipment & energy products | Supply enquiries

Supply and sale enquiries for company-owned vehicles, machinery, equipment, solar products and other goods. Outright purchase and eligible instalment options are considered separately. Installation and maintenance depend on the product and agreed scope.

Structured instalment sales | Subject to assessment

Eligible products or CNG installations may be purchased through an agreed payment plan. Cash price, total instalment price, down payment, payment schedule and ownership terms are disclosed before commitment. An application does not guarantee approval.

Technology, tracking & security | Expanding services

Practical tools for fleet records, remittances, maintenance and business reporting. Tracking and vehicle security services are in development; customers can register their requirements and confirm availability.

03 / OPERATING BUSINESS PLAN

Clear scope. Accountable delivery.

1. Understand the requirement

Record the customer need, vehicle or product specifications, location, intended use and delivery constraints. Assess technical suitability and available capacity before making a commitment.

2. Agree the transaction

Provide a written quotation or agreement covering scope, price, payment arrangements, responsibilities, timing, exclusions and support. For vehicle work, document the received condition and customer belongings before work starts.

3. Deliver and document

Record the goods supplied or work completed, the agreed checks, payment evidence and customer acceptance. State maintenance, warranty and after-sales responsibilities in the transaction documents.

4. Support and improve

Maintain service and collection records, respond to issues and use operating evidence to improve delivery. Customer references, photographs and testimonials are published only with permission.

How the business earns

Transport: operating and contracted service income.
Supply and sales: margins on goods sold.
Technical services: installation, diagnostics, repair and maintenance charges.
Instalment sales: the disclosed margin within the agreed total sale price.
Technology: setup, support or subscription charges as offerings become available.

Transaction discipline

Confirm scope and capacity; keep accurate records; disclose charges and responsibilities; track delivery and support. Instalment sales are for agreed goods or installations and do not represent a general cash-loan offer.

04 / GROWTH AND PARTNERSHIPS

Grow from evidence. Build lasting relationships.

Near-term priorities

Standardise transport, CNG and vehicle-service delivery; strengthen quotations, job records and customer acceptance; assess supply requests against reliable suppliers and support capacity; maintain accurate instalment-sale and collection records.

Develop the wider service portfolio

Expand equipment and energy-product supply through documented supplier arrangements. Develop tracking and vehicle security services with suitable technical support. Improve the separate Automotive, Instalment and fleet tools as their operating requirements become clearer.

Partnership opportunities

We welcome enquiries from equipment and component suppliers, fleet owners, technical partners, corporate customers and transaction funding partners. Each proposal is assessed against its exact scope, costs, revenue source, delivery controls, reporting, risks and agreed terms. This profile contains no guaranteed returns or financial forecasts.

Use the right platform

Corporate enquiries: https://evertechub.com
Automotive: https://auto.evertechub.com
Instalment applications: https://instalment.evertechub.com/apply
Platform requests remain subject to availability and transaction-specific assessment.
